

THIS! IS CANADA

VOILA! LE CANADA

Interpretation:

This map is meant to give an overview of the major landmarks and beaches in Vancouver, which I have been discussing with my buddy. They are all outlined in blue and filled in grey, however the landmarks have red markers, and the beaches have blue markers. I hope this map highlights the best places to visit and sightsee while in Vancouver. Some notable places outlined are Kitsilano Beach, which my buddy and I discussed upon first meeting, as well as Science World and the Vancouver Aquarium, major tourist attractions in Vancouver. My personal favourite spots on the map are Jericho Beach and the Vancouver Art Gallery. On my map, in its non-image form, you can find titles and descriptions for each landmark/beach, with what makes it such a Vancouver hotspot. Many of the attractions are found in downtown Vancouver, as there is a visible cluster of red markers on the map. Many attractions are also found in UBC, the University of British Columbia, where there is a large rose garden as well as a conservatory, both frequented by students. I hope my map will bring clarity to some great sights and attractions in Vancouver!
