

THIS! IS CANADA

VOILA! LE CANADA

Map of Light Pollution on PEI

Data Source: <https://advances.sciencemag.org/content/2/6/e1600377> World Atlas 2015

I chose to do a map of light pollution for my map because I wanted to be able to visually represent the amount of land that humans have taken while also emphasizing a specific impact that human activity has on our natural world. Light pollution makes it much harder to see stars, and without it, the night sky would be much brighter.
